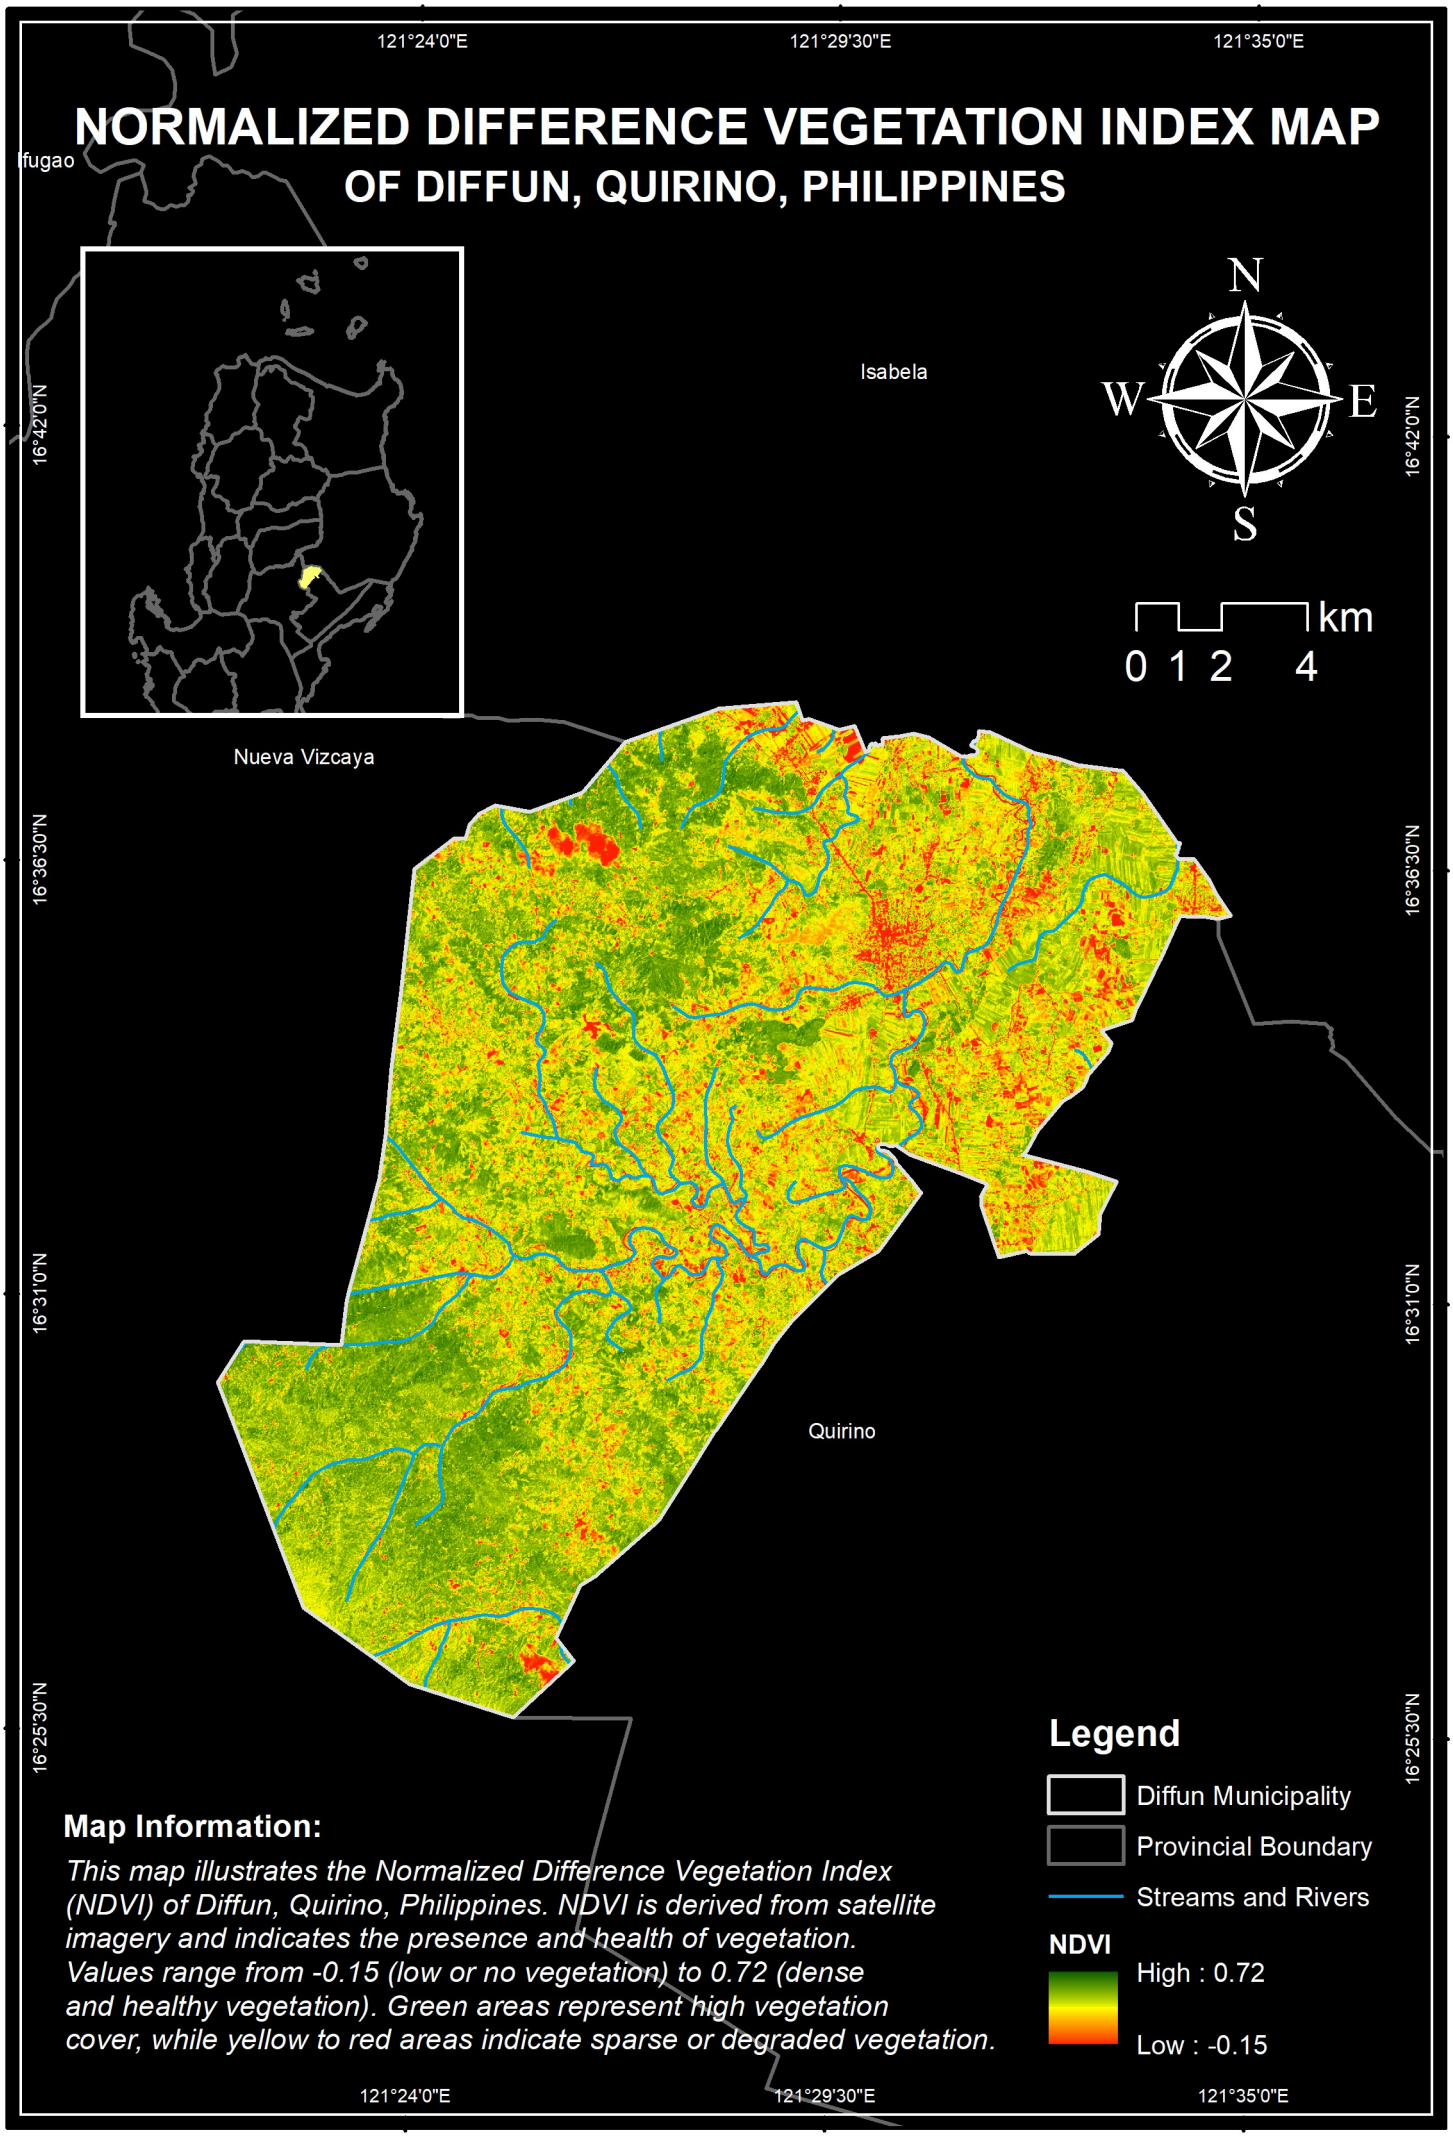
NORMALIZED DIFFERENCE VEGETATION INDEX MAP
OF DIFFUN, QUIRINO, PHILIPPINES



Map Information:

This map illustrates the Normalized Difference Vegetation Index (NDVI) of Diffun, Quirino, Philippines. NDVI is derived from satellite imagery and indicates the presence and health of vegetation. Values range from -0.15 (low or no vegetation) to 0.72 (dense and healthy vegetation). Green areas represent high vegetation cover, while yellow to red areas indicate sparse or degraded vegetation.
